- Project Management
- Planning and Organization
- Risk Management
- Budgeting
- Timeline Management
- Stakeholder Management
- Digital Marketing Knowledge
- Leadership and Team Management
- Agile Methodology
- Motivation
- Conflict Resolution
- Communication Skills
- Presentation Skills
- Negotiation Skills
- JIRA
- MS Office
- G-Suite
- Java, C, C++
- Embedded C
- SOAP/REST API
- Mulesoft

ROLES AND RESPONSIBILITIES

- Prepare a High-Level Plan/Project Roadmap for the entire project by collaborating with all stakeholders.
- Facilitate strong follow-ups throughout the Software Development Life Cycle (SDLC) in planning, execution, monitoring, testing, and deployment.
- Allocate resources in alignment with design requirements and client-provided delivery timelines.
- Ensure team alignment with the Signed Statement of Work(SOW) by stakeholders.
- Managed and led a dynamic team of up to 50 members, effectively coordinating their efforts to achieve project milestones and exceed organizational objectives.
- Execute all sprint ceremonies - Sprint Planning, Scrum calls, Backlog Refinement, Sprint Retrospective, and Sprint Review.
- Conduct daily stand-up meetings to ensure the team is on track without impediments.
- Proactively identify and resolve potential blockers by approaching the right resources or stakeholders.
- Realistically set time estimates based on team capacity, velocity chart, and BurnDown Chart.
- Monitor the RAID Log daily, alerting for any risks that could be show-stoppers. Plan and mitigate active risks, addressing them before escalation by the client. Maintain project budget within the Triple Constraint Triangle.
- Manage team members time and ensure their commitment to the project.
- Calibrating time projections by leveraging team velocities, ensuring Sprint Planning sessions are anchored in realistic and data-driven estimations.
- Mediating and defusing conflicts, ensuring team cohesion and fostering a harmonious work environment.
- Prepare a pre-Kickoff (KO) checklist and submit it to the Sales Team.
- Conduct Scrum Retrospectives to enhance team performance.
- Create backlogs with Team Lead based on the submitted plan & Conduct regular meetings with stakeholders to facilitate tasks and ensure alignment.
- Conduct sprint planning sessions every two weeks to ensure user stories meet capacity.
- Strictly adhere to Agile principles throughout the organization and make the team flexible as per client requirements.
- Escalating internal challenges promptly, prioritizing timely resolutions to preempt client escalations.
- Prioritizing stakeholder satisfaction, continually aligning project outcomes with their expectations and feedback.
- Delivering weekly comprehensive progress reports, ensuring stakeholders remain informed and engaged throughout project lifecycles.

CAREER HISTORY

NTT DATA	Chennai
Digital Project Manager Senior Consultant	May 2022 to Till Date
SRM Technologies	Chennai
Programmer	Feb 2022 to May 2022
Altsense Technology Solutions	Chennai
Project Associate	Apr 2018 to Dec 2021
Firmware Engineer	May 2016 to Mar 2018
Embedded Intern	Jan 2016 to Dec 2021

SCHOLASTIC ACHIEVEMENTS

Anna University	Chennai
M.E. in Solar Energy	Cumulative GPA : 8.0
St. Joseph's College of Engineering	Chennai
B.E in Electrical Engineering	Cumulative GPA : 7.4
Zion Matriculation Hr. Sec. School	Chennai
Higher Secondary Education	Percentage : 87%
Zion Matriculation Hr. Sec. School	Chennai
Secondary School Leaving Certificate	Percentage : 92%

PROFESSIONAL CERTIFICATIONS

- **CSM** - Certified Scrum Master
- **MIA** - Mulesoft Integration Associate

PROJECTS EXECUTED

Propio Language Services Role: Scrum Master/ Project Manager	Nov 2023 to Till Date
Propio LS is a team who interprets and manages the languages. Translation and live interpretation were the key features of their tool. Live interactions with interpreters are a highlight of the organization. They were using Celigo which is an integration tool and we Migrated the same to Mulesoft. We handled different systems such as Netsuite, SQL Server & Salesforce to sync the data of customer orders, customer data & Transactions.	
The Pokemon Company International Role: Scrum Master/ Delivery Manager	Jun 2022 to Till Date
We streamlined Pokemon's e-commerce operations through the automation of processes. This involved migrating legacy software from the Microsoft AX system and developing integrations within the Oracle Cloud framework using Mulesoft. Additionally, we established seamless connectivity between AX ERP and Ingram Micro, and strategically created reusable components. These efforts are designed to pave the way for a smooth transition to Oracle ERP post-engagement.	
Discount Tire Role: Project Manager	Jul 2022 to Till Date
Discount Tire Managed Services constitutes an integration initiative that interlinks sales, HR, and vehicle service components. We have successfully integrated various systems using MuleSoft, establishing a seamless connectivity infrastructure among the diverse services offered by clients. This intricate project involves more than 64 applications.	
Verdigris Role: Project Manager	Jul 2022 to Mar 2023
Verdigris is a digital banking product designed to simplify and make banking cost-effective for institutions, organizations, and brands of various scales. This solution caters to both banking and non-banking entities. We have crafted RESTful APIs utilizing MuleSoft, offering a product that seamlessly integrates into any current system. It is not only easy to implement but also adaptable and expandable to meet diverse needs.	
Intelligent Safety Alarm in Industries Role: Project Manager	Jun 2021 to Dec 2021
In the year 2000, the client manually managed safety standards and the fire hydrant system, a task that has now been automated by our company. The project, implemented using PIC32F, involves communication between the controller and the existing module through the Modbus Protocol. Tech Stack Utilized is JAVA, HTML, C & C++. Various parameters, including fire alarm, smoke alarm, theft alarm, and trespasser alarm, are transmitted to the server via Ethernet. The device settings, such as password, pin change, and user authentication, can be configured using a mobile device with a predefined list of SMS codes.	
Smart Routing Bot Role: Project Manager	Aug 2019 to Dec 2021
The Smart Routing Robot employs an intelligent Routing Algorithm within warehouse or hotel environments, adapting to specific needs and available space for transporting objects weighing more than 50 kg. The Atmega328 Microcontroller issues commands to the motor driver based on inputs from the Mobile Application, guiding the robot along a predefined route. Users interact with the Mobile Application to input destination details, and the robot navigates using Magnetic Tape affixed to the pathway. Tech Stack Utilized is JAVA, HTML, C & C++.	

ACKNOWLEDGMENTS AND ACCOLADES

- Earned five "Raving Review" accolades at Apisero Global Integrations Ltd (NTT DATA).
- Garnered three "Apisero Ace" recognitions at Apisero Global Integrations Ltd (NTT DATA).
- Received the "Kokua" honor for exceptional teamwork at Apisero Global Integrations Ltd (NTT DATA).
- Recognized with the "Selflessness Award" for dedication at Apisero Global Integrations Ltd (NTT DATA).
- Honored as the "Best Leader" at Altsense Technology Services Llp.
